Copy Optimizer	4

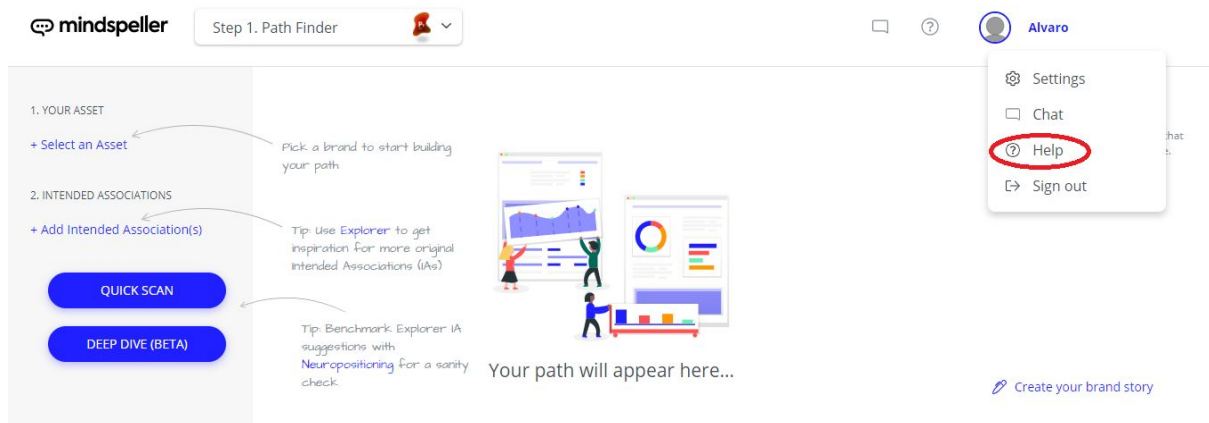

Questions?

contact@mindspeller.com

1. Feature updates

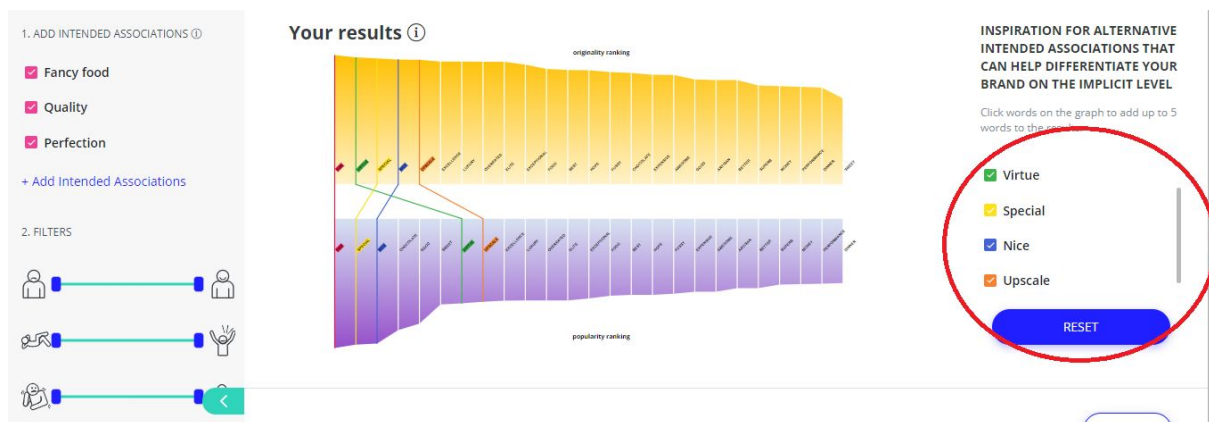

1.1 General

Added **infographic** to the guidance pdf. The pdf can be accessed by clicking on your username and then selecting **“help”**.

1.2 Path Finder

Added a new **‘Deep dive (beta)’ algorithm**. This algorithm explores a deeper part of the network in order to have the generated results more general and closer to the core of human language semantics.

1.3 Explorer

Added **tooltips** for the emotional filters in Explorer.

Questions?

contact@mindspeller.com

1.4 Copy Optimizer

- Moved IA associations to a **separate button** to improve clarity. The button can be found by hovering the IA in the **left sidebar**.
- Selected IA's can now be removed in **Copy Optimizer**.

1.5 Organization user self-management

- From now on, "Organization Administrators" are able to invite **new users** to their organization and **edit existing users** belonging to their organization - change their access levels and disable their access.
- If your organization has no "Organization Administrator", please contact Mindspeller to set one.

2. Bug fixes

Copy Optimizer

Fixed a bug that could cause the Copy Score bar chart to be **drawn incorrectly** when opening Copy Documents.
